// WORK EXPERIENCE

Roku - UK

Senior Software Engineer | July 2023 - Present

Partner Platform

Developing Roku Test Central for our partners and helping teams adopt AI across multiple projects.

Smart Home

Developed a web application for live camera streaming and recording management; mentored and managed interns during the project.

Customer Care / Web Core

Contributed to the development and project management of a new enterprise email platform and worked on various internal applications to support customer service operations.

Ensono Digital - UK

Senior Front-End Consultant | Jan 2022 - July 2023

I led the technical front-end development for an open-source NX project called "Stacks", re-platformed The Gym Group to Next.js hosted on Azure, and built a custom Node.js cache manager.

Sky Betting & Gaming - UK

Senior Software Engineer | Feb 2020 - Dec - 2021

SkyVegas

I led the front-end re-platforming to Next.js on AWS, migrated the back-end to Apollo GraphQL, and co-authored cross-product technical guidelines.

Sky Betting & Gaming - UK

Software Engineer | May 2016 - Feb 2020

In-house Promotions Platform

Transitioned to back-end development, building Scala microservices for a Kafka-based streaming platform hosted on Kubernetes.

SkyCasino

Worked on a PHP-based responsive web app and built a React/Node.js/Socket.IO application optimised for TV screens.

EPAM Systems - HU

Software Engineer | Sep 2014 - Apr 2016

Worked on an enterprise-level responsive web app for a Dutch client using a custom AngularJS framework within a Scrum team.

Neuron Software Ltd. - HU

Junior Software Engineer | May 2013 - Sept 2014

Worked on a customer-facing JavaEE/JSF/JS self-service app and developed an Android / iOS mobile KPI dashboard with a Java back end.
